Paperwhites

Paperwhites

Directions for Planting and Caring for Your Paperwhites

Forcing Paperwhites indoors in an enjoyable project which anyone can do. It is especially enjoyable in the winter when this little touch of spring will brighten any room.

Directions: Fill the pot with soil and plant the bulbs -pointy side up- leaving the tip showing. Water them thoroughly and then continue to water as needed to keep the soil moist during growth. Place the pot in a sunny location but out of direction sunlight. When they have flowered, keep them in a spot without direct sunlight if you want to prolong the blooms. Your flowers should bloom in 4-6 weeks.
